

Sectra Table

Technical specifications

Clinical insight through interaction & visualization

Engaging with virtual representations of real-life bodies based on clinical imaging deepens diagnostic interpretation and enhances spatial awareness of anatomical structures. The Sectra Table enables interactive exploration of medical images, providing a realistic view of functions and processes within the human body.

By combining highly relevant medical cases from Sectra Education Portal with intuitive, hands-on interaction, the Sectra Table maximizes learning impact and fosters collaborative discussions, critical thinking, and problem-solving.

Precision touch & immersive visualization

The Sectra Table is a 65-inch, 4K capacitive touchscreen monitor equipped with electrical tilt functionality, allowing users to seamlessly switch between table mode and vertical display mode to fit various teaching and discussion formats.

Seamless integration with Sectra Education Portal

The Sectra Table seamlessly connects to our cloud-based learning portal, allowing users to access real patient cases, visualize cross-sectional anatomy, and enhance diagnostic training in a simulated clinical environment.

Why choose the Sectra Table?

- » Seamless integration with Sectra Education Portal.
- » Boosts teamwork and diagnostic confidence.
- » Multi-touch for precise image control.
- » Smooth, high-performance rendering.
- » QLed technology for lifelike visualization.
- » Adjustable tilt for flexible teaching.
